# INDEX (TOM. XIII-XIV)

|   |       |     |
|---|-------|-----|
| Chiba, K. Note on the asymptotic behavior of solutions of a system of linear ordinary differential equations.....                               | XIII, | 51  |
| Endo, M. A note on locally compact division rings .....   | XIV,  | 57  |
| Hiramatsu, T. Modular forms obtained from $L$ -functions with Grössen-characters of $Q(\sqrt{-3})$ .....  | XIV,  | 65  |
| Hirose, K. A theorem on incomparable degrees of recursive unsolvability .....   | XIII, | 25  |
| Hitotumatu, T. A characterization of the determinant.....   | XIII, | 45  |
| Hitotumatu, T. Some considerations on the best-fit polynomial approximations II.....  | XIV,  | 71  |
| Kono, M. and Kusano, T. A boundary value problems for nonlinear parabolic of the second order .....   | XIV,  | 85  |
| Krzywoblocki, M. Z. v and Roth, H. On the reduction of the number of independent variables in systems of partial differential equations .....   | XIII, | 1   |
| Krzywoblocki, M. Z. v and Roth, H. On the reduction of the number of independent variables in systems of partial differential equations 2 ..... | XIV,  | 1   |
| Kurata, R. On the existence of a proper complete model of set theory .....  | XIII, | 35  |
| Ohkuma, T. Closed classes of models .....   | XIII, | 63  |
| Sampei, Y. On the complete basis for the $\mathcal{A}_2^1$ sets .....   | XIII, | 81  |
| Satô, Y. On a system of nonlinear ordinary differential equations containing a small parameter.....   | XIV,  | 25  |
| Satô, Y. Periodic solutions of $\ddot{x} + f(x, \dot{x})\dot{x} + g(x) = 0$ .....   | XIV,  | 97  |
| Tanaka, H. On limits of sequences of hyperarithmetical functionals and predicates.....  | XIV,  | 105 |
| Tomonaga, Y. Some applications of characteristic classes....  | XIV,  | 53  |
| Zama, N. On models of algorithms and flow-charts .....  | XIV,  | 123 |
